

FRYMASTER PMJ135GSD

GAS FRYER—20 Litre

The PMJ135GSD has a minimum 15 litre and maximum 20 litre oil capacity. The frying area is 305 x 381 mm. This 107.6mj model is specifically designed for all-purpose frying and produces 30kg of french fries per hour -- frozen to done. The exclusive 1° action thermostat anticipates rapid rate of temperature rise, reducing temperature overshoot, extending shortening life and producing a more uniformly-cooked product. Centerline thermostat mounting permits quick sensing (7-10 seconds) of cold food placed in either basket. Unique Master Jet burners have no burner tube radiants to burn out. No burner cleaning or air shutter adjustment is required.

The open stainless steel frypot has a large heat transfer area to fry more product per load. The open-pot design has no hard-to-clean tubes. Every inch of the frypot and cold zone can be cleaned and wiped down by hand.

STANDARD FEATURES

- Open-pot design is easy to clean
- Millivolt controls
- Rounded corners for easy-to-clean “Euro” look
- Master Jet burner, no burner tube radiants to burn out, no cleaning or adjusting air shutters
- Durable centerline thermostat, 7- to 10-second response to loads, 1° anticipating action, reduced temperature overshoot
- 15-20 litre oil capacity
- Deep cold zone, 32 mm IPS ball-type drain valve
