

Pizza Dough Roller - IGF 2300 B30/B40

Description

Pizza Dough Roller Machines are designed to cold work the pizza dough so as not to alter its characteristics.

One pair of adjustable rollers for you to get a sheet of dough as many millimetres thick as you like.

- System of lower rollers and an idle roller favour the process
- of putting the dough into the machine (system patented by IGF).
- Separate roller protectors for better OH&S (patented by IGF).
- Transformers have gears made of special resins; they have been pressed, instead of indented, so as to last five times more than normal ones (IGF patented).
- Foot control pedal.
- Internal reinforcements to prevent the frame from bending.
- IN ACCORDANCE WITH WORLDWIDE HEALTH AND SAFETY REGULATIONS
