† Ventless certification is for all food items except for foods classified as "fatty raw proteins." Such foods include bone-in, skin-on chicken, raw hamburger meat, raw bacon, raw sausage, steaks, etc. If cooking these types of foods, consult local HVAC codes and authorities to ensure compliance with ventilation requirements.

Ultimate ventless allowance is dependent upon AHJ approval, as some jurisdictions may not recognise the UL certification or application. If you have questions regarding ventless certifications or local codes, please email ventless_help@turbochef.com

TurboChef reserves the right to make substitutions of components or change specifications without prior notice.

⚠ TurboChef requires installing a type D circuit breaker for all installations.
