Unox Intelligent Performance

Improve your performances

Achieving identical results for each load requires control, intelligence and expertise: exactly what CHEFTOP MIND.Maps™ PLUS combi oven is made for.

ADAPTIVE.Cooking™

Perfect results. Every time.

By registering changes in humidity and temperature, CHEFTOP MIND.Maps™ PLUS combi oven automatically adjusts the cooking process to the actual food-load to deliver an identical and perfect result every time.

CLIMALUX™

Total humidity control.

The oven features accurate sensors to measure the actual humidity inside the cooking chamber and automatically activates steam production or evacuation to ensure that actual humidity always matches the set one.

SMART.Preheating

Intelligent preheating.

Combining the analysis of previous cooking processes with the requirements of the next one, the oven automatically sets the best temperature and preheating time to guarantee maximum repeatability of results throughout the day, therefore reducing waiting time.

AUTO.Soft

Gentle cooking function.

When activated, the oven automatically regulates the rise in temperature to make it gentler and guarantee an optimal heat distribution on each pan in the oven. The best for delicate and heat-sensitive foods.

SENSE.Klean

Intelligent cleaning.

By estimating the degree of dirtiness, based on the type of cooking recognised by the oven, it suggests the best automatic cleaning mode according to the actual use of the oven. Maximum hygiene and zero waste of water and detergent.

With

Adaptive.Cooking™

It sets automatically all cooking parameters to guarantee the same result for every process.

Unox Intensive Cooking

Maximum cooking intensity

Perfect cooking, uniformity on each tray, saturated and dense steam or complete extraction of humidity, intense or gentle air flows.

DRY.Maxi™

Humidity gives way to flavour.
Effectively removes humidity from the cooking chamber to give your preparations perfect consistency, colour and crunchiness every time.

STEAM.Maxi™

The power of steam is in your hands.
Generates saturated steam from 35 °C and delivers high steaming performance combined with energy and water savings.

Uses multiple high flow reversing fans to deliver uniform results and short cooking times. 4 speeds of the fan allow to perform any kind of cooking.

EFFICIENT.Power

Power and efficiency.
Quick temperature rise, high-precision temperature control, ENERGY STAR certified efficiency at the top of the category in combi, dry air and steam modes.

PRESSURE.Steam

Even more steam when you need it.
Increases steam temperature and its saturation to effectively allow you to further reduce steaming time and its intensity.

Zero smells in your kitchen

Ventless Hood

Within the ventless hood, a self-cleaning filter **removes odours** from the fumes that are expelled through the oven chimney, without the need for maintenance or cleaning work on the filter. It allows you to install your oven even far from a ceiling canopy and force exhausts into it or outside.*

*Subject to inspection and approval by organisations and to local regulations.

With activated carbon filter

Ventless Hood

Features the self-cleaning filter **plus an activated carbon filter** that further removes smells, even those that are sucked when the door is opened at the end of a cooking cycle. It allows you to install your oven far from a ceiling canopy or without it.*

*Subject to inspection and approval by organisations and to local regulations.

Slow cooking and Holding

SLOWTOP

Low temperature cooking, slow braising, slow roasts, sous vide cooking, regeneration, holding, night cooking. Just some of the countless cooking techniques that SLOWTOP Cook'n'Hold offers. Thanks to its single-phase electrical power supply, it ensures unbeatable performances with **minimal consumption** and is the perfect partner for your oven.

Smoke. Cook. Amaze.

HYPER.Smoker

HYPER.Smoker transforms your oven into a smoker. You can use shavings of natural wood and choose from among **10 different smoking intensities** directly from the control panel of the oven to amaze even the most demanding of palates. Moreover you will smoke food using the energy produced in the cooking chamber without further costs and external electrical power supply.

SMART.Drain

Cooking fat collection system

SMART.Drain is the ideal solution for supermarkets, deli shops, production kitchens and steak houses that carry out cookings with large amount of fat.

Its functioning is based on a special two-way valve that **collects any fat and cooking liquids** created during the cooking program and **drains them into a tank**.

Liquid to tank
(fat collection)

Liquid to drainage
(washing and
low-fat cooking)

For each one of your cooking or washing programs, **your oven automatically checks the correct position of the valve** to avoid any risk of the drain being blocked by condensed fat.

The special **POLLO.BLACK trays convey the fats towards the drain**, reducing by up to 80% the amount of fat deposits that accumulate in the cooking chamber compared to normal grills.
